JOHN MICHAEL S. PANIZALES

Front-End Developer • UI/UX

+63 951 819 6687 | michaelpanizales1203@gmail.com | michaelpanizales.vercel.app | General Santos City, Philippines

SUMMARY

Front-End Developer focused on UI/UX — turning designs into polished, accessible, and responsive interfaces for web and mobile. Currently at Realty ONE Group Philippines, shaping the user experience of the company's internal brokerage platform and its public website. Previously built SaaS dashboards, mobile apps, and custom WordPress sites for Simply Expanding Digital Marketing Services and Falcon Media Australia. Graduated with a 1.58 GWA and Best Capstone Award from STI College of General Santos. Built GenSan Transport, a civic-tech tool featured in the Daily Tribune for addressing tricycle fare overcharging.

EXPERIENCE

Realty ONE Group Philippines **May 2026 – Present**

Front-End Developer | *General Santos City, Philippines (Remote)*

Front-end and UI/UX developer for the Philippine arm of the Realty ONE Group real estate brand, shaping the look, feel, and usability of the company's internal brokerage platform and public website.

- Designed and built user flows for an internal brokerage platform used by agents, brokers, and admins — listings, deal tracking, agent profiles, and content publishing — in Next.js, React, TypeScript, and Tailwind CSS
- Turned long, complex forms into guided multi-step wizards with inline validation, saved drafts, and clear error states to reduce friction and input mistakes
- Maintained a shared design system — reusable components, brand tokens, typography, and empty/loading states — and led a brand-guidelines audit to keep the product visually consistent
- Crafted micro-interactions and onboarding — animated navigation, loading skeletons, toasts, and a first-run guided product tour — so the app feels fast and approachable
- Built the public website realtyonegroup.ph from the provided designs — 15+ responsive pages for buying, renting, selling, broker discovery, and lead capture — with accessible markup, SEO metadata, and social share cards

Simply Expanding Digital Marketing Services **Aug 2025 – Apr 2026**

Front-End Developer | *General Santos City, Philippines*

Front-end developer for a General Santos–based digital agency, working alongside the Falcon Media Australia partner engagement concurrently.

- Built the interface of a SaaS web application using React, TypeScript, and Tailwind CSS
- Built mobile app screens and user flows with React Native, Expo, and TypeScript
- Worked directly with clients and the internal team to turn requirements into user-friendly deliverables

Falcon Media Australia **Aug 2025 – Apr 2026**

Front-End Developer (Concurrent Engagement via Simply Expanding) | *General Santos City, Philippines*

Front-end developer for an Australian media company, contributing across web, mobile, and content-managed sites for Australian clients.

- Built the interface of a Decision Support System (DSS) web application using React, TypeScript, and Tailwind CSS
- Built mobile app screens and user flows with React Native, Expo, and TypeScript
- Developed custom WordPress sites and landing pages with PHP, ACF, and responsive, mobile-friendly theming

CMO-ICTD **Jan 2025 – May 2025**

Hardware Department On-the-Job Trainee | *General Santos City, Philippines*

ICT Division of the City Mayor's Office — maintenance and connectivity for LGU General Santos City.

- Diagnosed and repaired hardware issues including faulty power supplies, dead hard drives, and unresponsive components
- Reformatted and installed Windows OS without bloatware to improve performance on lower-end machines

GYOCC.ONLINE **Apr 2024 – Nov 2024**

Front-End Developer | *General Santos City, Philippines*

First web management system for Gensan Youth Orchestra and Choir Corporation — appointment booking, lesson scheduling, and concert/performance ticket management.

- Developed a responsive UI using HTML, CSS, and JavaScript for smooth user interaction
- Developed user-friendly pages for booking appointments, viewing lesson schedules, and managing tickets
- Continuously tested and debugged the website to maintain stability and performance

PROJECTS

GenSan Transport *gensantransport.vercel.app*

Public utility that calculates tricycle fares and maps bus routes across General Santos City. Featured in the Daily Tribune for addressing fare overcharging.

- Integrated 3 external APIs (OSRM, Nominatim, OpenStreetMap) for automatic route and fare calculation
- Built with Next.js, TypeScript, Tailwind CSS, and MapLibre GL

Alertison *Published on the Apple App Store*

Family location tracking and emergency management mobile app. Built with Calvin Drakke Rulete (Back-end).

- One-tap SOS with haptic feedback, live GPS capture, and real-time broadcast to every linked family member
- Built with React Native, Expo, and TypeScript; companion landing page at alertison.com.au

Raidium *raidium.quest*

Multi-tenant SaaS for MMORPG guild management. Built with Calvin Drakke Rulete (Back-end).

- Designed the landing page (before/after slider, OCR-demo interactions) and guild dashboard UI/UX across multi-tenant /g/[slug] spaces
- Front-end built with Next.js, TypeScript, Tailwind CSS, React Hook Form, and Zod

Pickleball GenSan *pickleballgensan.vercel.app*

Real-time matchmaking platform for Pickleball players in General Santos City. Built with Calvin Drakke Rulete (Back-end).

- Installable PWA with real-time matchmaking queue and Leaflet-based player/court map
- Front-end built with Next.js, TypeScript, Tailwind CSS, Zustand, and Socket.IO
